

CAS 221231-10-3 Aod9604 Peptide Vials 2mg For Muscle Building

Basic Information

- Place of Origin: China
- Minimum Order Quantity: 10vials
- Price: USD
- Packaging Details: 1kg/Foil Bag
- Delivery Time: 3-7days after received payment
- Payment Terms: T/T, Western Union, PayPal
- Supply Ability: 5000KG Per Year

Product Specification

- Product Name: Aod9604
- Cas: 221231-10-3
- Appearance: Freeze Dried Powder
- Specification: 2mg
- Usage: Muscle Building
- Highlight: **Aod9604 Peptide Vials,
221231-10-3 Peptide Vials,
2mg Peptide For Muscle Building**

Product Description

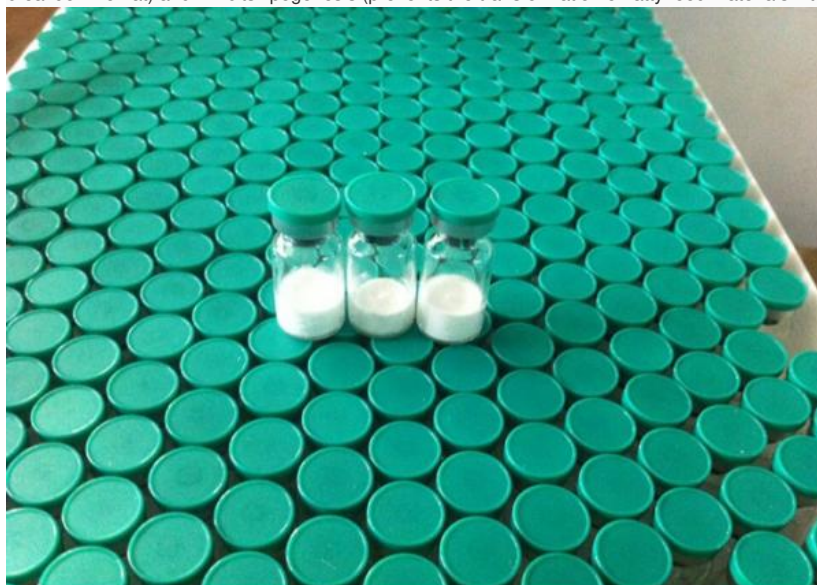

CAS 221231-10-3 Aod9604 Peptide Vials 2mg For Muscle Building

Product description

Product name	aod
CAS No.	221231-10-3
Other Names	aod9604
Molecular Formula	C78H123N23O23S2
Molecular weight	1815.08
Grade Standard	Medicine Grade
COA	Available

Product introduction

AOD-9604 is a peptide of the C-terminus to which a tyrosine is added at the N-terminus. Studies have suggested that AOD-9604 is more effective than its predecessor AOD-9401 in its ability to stimulate lipolytic and anti-lipogenic activity. AOD-9604 stimulates lipolysis (the breakdown of fat) and inhibits lipogenesis (prevents the transformation of fatty food materials into body).

What Is AOD-9604 Peptide

AOD9604 is a modified version of fragment 176-191, which is itself a smaller, modified piece of . AOD9604 was originally developed as an anti-obesity drug due to its lipolytic (fat burning) properties. This peptide is valued for the fact that it has limited effects beyond fat burning. It does not appear to affect IGF-1 levels or insulin levels and therefore is not a risk factor in promoting glucose intolerance or diabetes. There is also no evidence that the body forms antibodies against AOD9604 as it is similar enough in structure to to avoid stimulating an immune system response.

Effect:

Weight loss through the lipolysis
Improves skin elasticity and ridding wrinkles
Increases IGF-1 level and immune system
strengthens mineralization of bone and density
Improves eyesight and Improves sleep patterns

How Does It Work?

AOD-9604 works for people who are dealing with obesity. It does not only help to improve metabolism but also to build muscle. The bodies of obese people may have trouble burning fat. AOD-9604 mimics the hormone which stimulates fat metabolism. It, therefore, promotes faster loss of weight by improving metabolism. It enhances the functioning of beta-3 receptors.

This makes it different from other medications that treat obesity. Other medications suppress appetite or the rate of food absorption. The peptide has a high capacity to burn fat. It triggers the release of fats from the fat cells which lead to obesity. It is especially great in reducing stubborn fats in the abdominal area.

The Benefits Of AOD-9604 Peptide

Regulate the body's metabolism,
Stimulate the body's metabolism natural fat-burning process
Triggers release of fat from obese fat cells
And decreases the growth of new fat that surrounds the fat cells, which helps the body gain more significant weight loss.
Reduce body fat
Increase the calories you burn
Trigger fat release while boosting your metabolism
And help bone and cartilage repair

Package and Shipping of AOD-9604 Peptide

Package: 2mg/vial, 10vials/box

Shipping: With 3-5 days after your payment
