Appearance	White crystalline powder
MF	C ₁₉ H ₂₆ O ₂
MW	286.41
Shelf life	2 years

What is CAS 846-48-0 Raw Hormone Powder Boldenone Base Boldenone ?

Boldenone is an anabolic developed for veterinary use, primarily in the treatment of horses. Boldenone is now widely used by bodybuilders. Boldenone increases lean muscle mass, strength and the ability to train longer and harder.

Bodybuilders use Boldenone to increase appetite, increase lean muscle mass, reduce fat and improve strength. and improve strength. Athletes also take boldenone to indirectly cause the body to produce more blood cells.

Indirectly, by stimulating the release of erythropoietin (EPO) from the kidneys, it causes the body to produce more blood cells. (EPO is a hormone that activates the production of red blood cells in the bone marrow). More red blood cells increase endurance by enabling the blood to transport more oxygen.

The blood transports more oxygen. Bodybuilders report using doses of up to 800 mg per week.

The competitive benefits of using CAS 846-48-0 Raw Hormone Powder Boldenone Base Boldenone

This is a very common in the competition scene for reasons such as.

- It has a low amount of aromatization
- It also has minimal water retention.
- It is also known to give an increase in red blood cells at the pump you are doing because you are working out, due to the increase in blood cells, is one effect of taking it.
- It also leads to a sharp increase in appetite and it also guarantees good muscle growth when it is taken with weight gain.

Boldenone for beginners is basically taken with other such as builder if you are on a massive cycle or it is taken with Winstrol if you are on a cutting cycle.

If you are on a massive cycle, or it is taken with Winstrol if you are on a cutting cycle.

It is known to increase protein synthesis in muscle cells in the body, a similar effect to what you get when taking Anavar.

Boldenone gives slower but higher muscle growth, unlike the rapid muscle growth of. Unlike the rapid muscle gain from.

It should not be taken alone and one should be prepared to expect 20 lbs over the next 6 weeks or so. Results can be seen in 3 weeks or less as it is not as instant as you might expect.
