

## Terlipressin Acetate Raw Peptide Powder CAS 14636-12-5 Medical Use

Our Product Introduction

for more products please visit us on [bodybuild-supplement.com](http://bodybuild-supplement.com)

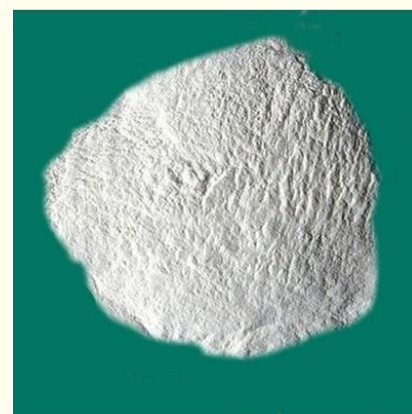

### Basic Information

- Place of Origin: China
- Minimum Order Quantity: 10Grams
- Price: USD
- Packaging Details: 1kg/Foil Bag
- Delivery Time: 3-7days after received payment
- Payment Terms: T/T, Western Union, PayPal
- Supply Ability: 5000KG Per Year

### Product Specification

- Product Name: Terlipressin Acetate
- Cas: 14636-12-5
- Appearance: White Powder
- Purity: 99%
- Use: Treatment Of Hepatorenal Syndrome
- Highlight: **Peptide Powder 14636-12-5, Medical Peptide Powder, Terlipressin Acetate**

## Product Description

### Medical Use Terlipressin Acetate Peptides Raw Powder CAS 14636-12-5

Product name	Terlipressin Acetate
Shelf Life	2 Years
COA	Available
Origin	China

#### Introduction:

Terlipressin is a synthetic peptide that is derived from vasopressin, a naturally occurring hormone in the body. Vasopressin plays a crucial role in regulating blood pressure and fluid balance. Terlipressin acetate is a synthetic vasopressin analog that is used for various medical purposes, primarily in the management of certain medical conditions related to blood pressure regulation and circulatory support.

#### Functions:

**Hepatorenal Syndrome (HRS):** Terlipressin is most commonly used in the treatment of hepatorenal syndrome, a serious complication of advanced liver disease. In HRS, there is a significant decrease in blood flow to the kidneys, leading to acute kidney injury. Terlipressin works by constricting blood vessels, particularly those in the splanchnic circulation, which can help improve blood flow to the kidneys and potentially reverse kidney dysfunction.

**Esophageal Variceal Bleeding:** Terlipressin may also be used in the management of bleeding esophageal varices, which are dilated veins in the esophagus often associated with liver cirrhosis. It helps reduce bleeding by constricting blood vessels and lowering blood pressure in the portal vein, which reduces pressure on the varices.

**Other Uses:** In some cases, terlipressin may be considered for other conditions associated with vasodilatation and low blood pressure, such as septic shock or gastrointestinal bleeding.

#### Side Effects:

While terlipressin can be effective for the conditions it is used to treat, it is not without potential side effects. Common side effects may include:

Nausea

Vomiting

Abdominal cramps

Diarrhea

Headache

Hypertension (high blood pressure)

More serious side effects are less common but can include:

Cardiac arrhythmias

Myocardial infarction (heart attack)

Ischemia (reduced blood supply to organs)

Chest pain

Shortness of breath

Water retention and fluid overload

Patients receiving terlipressin are typically closely monitored in a medical setting due to the potential for these side effects, especially when it is used for conditions like hepatorenal syndrome.

#### **Our Advantage**

1. Rich experience.

Our company is a professional production leading factory in China in pharmaceutical area of many years, our products have exported to Germany, Spain, UK, USA, Australia, Middle East, and so on other country, and we have got very good feedback from our customers, we had Established long friendly relations of cooperation.

2. Great quality, purity and favourable.

Good quality is one of our secret success, welcome order the samples, MOQ just 5 grams.

3. Safe and fast delivery.

We have stock, so we can delivery quickly at the very day when receive the payment.

We have special way could ship 0.01kg to 3.5kg products a time. We offer melting powder into liquid service. And ship the liquid in special bottles.

4. Good after-sales service.

Tell me the package update, and will try best solve when customer encountered various problems.
